

# THE RADIANT BEAUTY OF MACHINERY

闪耀机械之美

The mortise lock and cylinder hidden within the door leaf are likely the core components of the lock. The mechanical interdependence creates the opening and locking mechanism of the door, allowing the beauty of machinery to converge and shine with core strength.

深藏在门扇内部的锁体锁芯，可能才是门锁的核心组件，机械的互助联动，构成门扇的开启与锁定，让机械之美汇聚，闪耀核心的力量。

# The Inventor of The Magnetic Lock

磁力锁的发明者

The history of Italy's Bonaiti dates back to 1830. With over a century of development and refinement, Bonaiti achieved a major milestone in 2000 by producing the world's first magnetic lock, revolutionizing the structure of door locking systems.

Today, Bonaiti upholds its principle of 100% Italian manufacturing, employing 70 staff members and operating 12 automated production lines that produce 15,000 chrome handle locks.

We can confidently say that there isn't a country in the world where Bonaiti's mark isn't found on door locks.

意大利Bonaiti的历史可以追溯到1830年，百年沉淀和发展，让Bonaiti在2000年生产出全世界第一个磁力锁，开创了门锁锁定结构的新格局。

今天Bonaiti坚持100%意大利制造的准则，70名员工，在12条自动化生产线上生产15000把铭把手锁。

我们可以决定的说，世界上没哪个国家的门锁上没有Bonaiti的标志。

# New Realm of Silence & Magnetic Power

静音与磁力新境界

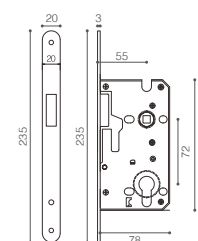

The mortise lock is the core strength of a door lock, responsible for supporting the rotation of the handle and ensuring locking security. CANOVO offers two standard mortise lock options: the silent mortise lock and the magnetic mortise lock. Depending on the client's living scenarios and handle configuration, the appropriate mortise lock can be selected. Both lock bodies share the same hole dimensions, allowing for easy pre-drilling and installation planning.

锁体是一把门锁的核心力量，承载把手的转动和发锁安全。CANOVO凯诺威的标准配置锁体有两款选择，静音锁体和磁力锁体，根据客户的生活场景，门把手的配置来对应选择锁体匹配。两款锁体具有相同的开孔尺寸，方便客户完成预先开孔计划。

# Hidden·Fantasy Series Mortise Lock

隐迹·幻彩系列锁体

Let the function hide behind the aesthetics, and the real security protection should exist naturally like air.

**Zero Hole Aesthetics:** the first traceless embedded installation technology, bid farewell to the visual fragmentation of the exposed screws of the traditional MORTISE LOCK.

**Colorful Customization:** Snap-on replaceable decorative covers that perfectly match the original color of the hardware.

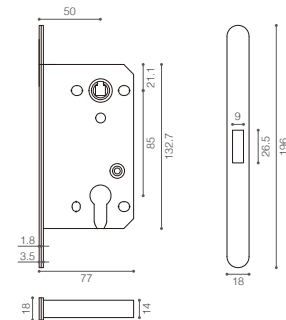

**Millimeter-level Precision:** CANOVO uses a safe and stable metal frame, and the ultra-thin decorative cover realizes the beauty of invisibility.

让功能隐身于美学的身后，真正的安全守护应该像空气般自然存在

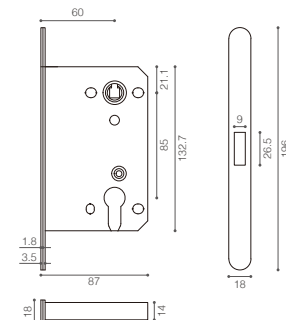

**零孔美学：**首创无痕嵌入式安装技术，告别传统锁体裸露螺丝的视觉割裂感；

**多彩定制：**卡扣式可更换装饰盖，完美匹配五金原色。

**毫米级精密：**凯诺威采用安全稳固的金属框架，超薄装饰盖实现隐形之美。
